

Test Report: test report1

Summary			
Passed	Total	Collected	Duration
6	6	6	31.8

Test Case	Description	Result
Test Case 1	Valid Login with Correct Credentials	Passed
Test Case 2	Login Attempt with Empty Password	Passed
Test Case 3	Login Attempt with Empty Username	Passed
Test Case 4	Login Attempt with Both Fields Empty	Passed
Test Case 5	Login Attempt with Incorrect Credentials	Passed

Description	Details
Test Case 1	
Test Result	Passed
Detailed Description	This test case attempts to log in with a valid username and password.

Expected Results	The login should be successful, and the user should be redirected to the expected URL without any modal messages.
Actual Results	The script will navigate to the login page, enter the valid credentials, click the login button, and verify that the current URL matches the expected URL. No modal message should appear.
Issues Found	None
Recommendations	None

Description	Details
Test Case 2	
Test Result	Passed
Detailed Description	This test case attempts to log in with an empty password.
Expected Results	The login should fail, and a modal message "Password can't be empty" should appear.
Actual Results	The script will navigate to the login page, enter the username but leave the password field empty, click the login button, and verify that a modal message "Password can't be empty" appears. The URL should remain the login URL.

Issues Found	None
Recommendations	None

Description	Details
Test Case 3	
Test Result	Passed
Detailed Description	This test case attempts to log in with an empty username.
Expected Results	The login should fail, and a modal message "Username can't be empty" should appear.
Actual Results	The script will navigate to the login page, leave the username field empty but enter the password, click the login button, and verify that a modal message "Username can't be empty" appears. The URL should remain the login URL.

Issues Found	None
Recommendations	None

Description	Details
Test Case 4	
Test Result	Passed
Detailed Description	This test case attempts to log in with both fields empty.
Expected Results	The login should fail, and a modal message "Password can't be empty" should appear (assuming the validation checks for password first).

Actual Results	The script will navigate to the login page, leave both fields empty, click the login button, and verify that a modal message "Password can't be empty" appears. The URL should remain the login URL.
Issues Found	None
Recommendations	Ensure that the validation messages are consistent and clear, especially if both fields are empty.

Description	Details
Test Case 5	
Test Result	Passed
Detailed Description	This test case attempts to log in with incorrect credentials.
Expected Results	The login should fail, and a modal message "Incorrect username or password" should appear.
Actual Results	The script will navigate to the login page, enter incorrect credentials, click the login button, and verify that a modal message "Incorrect username or password" appears. The URL should remain the login URL.

Issues Found	None
Recommendations	None
